## Technical Enablement & Developer Documentation Lead | Salesforce DevOps & Platform Enablement

Austin, TX 78729 • joseph.coronado0550@gmail.com • (281) 594-7225

### SUMMARY

---

Technical enablement and platform-focused engineer with 11 years of experience spanning developer documentation, API enablement, and enterprise SaaS platforms. Experienced in translating complex DevOps and integration workflows into structured documentation, training content, and self-service knowledge systems. Strong background in CI/CD, REST APIs, and enterprise support ecosystems with a focus on reducing support load through scalable knowledge programs. Proven ability to collaborate across engineering, product, and support teams to improve developer adoption and operational efficiency.

### SKILL SETS

---

Backend Engineering & APIs: Python, Node.js, TypeScript, REST APIs, GraphQL, OpenAPI/Swagger

Technical Documentation & Enablement: Markdown, GitBook, ReadMe, Document360, API Documentation Design, Developer Guides

Salesforce & DevOps Enablement: Salesforce Platform, CI/CD Pipelines, Sandbox Management, Version Control (Git), Release Management, DevOps Best Practices

Cloud & Infrastructure: AWS, Docker, Kubernetes, Terraform, CI/CD Automation

Data & Analytics: SQL, Zendesk Analytics, Salesforce Service Cloud, KPI Dashboards

Enablement & Learning Systems: Instructional Design, Certification Program Design, LMS Authoring, Knowledge Base Management, Training Content Development, Exam Blueprint Design

### PROFESSIONAL EXPERIENCE

---

**Cloudflare** · San Francisco, CA

#### Technical Enablement & Documentation Lead Jan 2023–Present

- Designed and maintained developer-facing documentation for APIs and platform services, improving onboarding efficiency for enterprise developers.
- Built structured documentation workflows using docs-as-code practices with Git-based versioning and review standards.
- Partnered with engineering teams to document CI/CD pipelines and release processes across distributed cloud services.
- Developed API reference standards using OpenAPI specifications, improving consistency across internal and external guides.
- Created self-service knowledge base content that reduced recurring developer support requests by consolidating common troubleshooting flows.
- Collaborated with product managers to align documentation updates with quarterly release cycles and feature rollouts.
- Standardized technical writing templates to ensure consistency across platform, security, and integration documentation.
- Analyzed support ticket trends to identify gaps in developer onboarding and updated documentation accordingly.
- Supported internal enablement initiatives by producing technical walkthroughs for platform APIs and authentication systems.

- Improved documentation discoverability through tagging systems and structured navigation improvements across developer portals.

**Spiceworks** · Austin, TX

### **Senior Developer Documentation Engineer Jan 2020–Dec 2022**

- Built and maintained IT service management documentation covering platform workflows, API integrations, and helpdesk automation.
- Translated support tickets from Zendesk into structured knowledge base articles to improve self-service resolution rates.
- Collaborated with engineering teams to document backend services supporting asset management and IT operations workflows.
- Developed API documentation for internal and partner integrations using REST standards and Swagger specifications.
- Analyzed user support trends to prioritize documentation updates and reduce repetitive technical inquiries.
- Created onboarding guides for IT administrators using platform configuration and workflow automation tools.
- Improved documentation searchability by restructuring knowledge base taxonomy and tagging system.
- Partnered with product teams to align release notes with feature documentation and customer enablement materials.

**Rightpoint** · San Francisco, CA

### **Technical Documentation Engineer Mar 2017–Dec 2019**

- Produced technical documentation for enterprise digital transformation projects across customer experience platforms.
- Collaborated with engineering teams to document API integrations and backend service workflows.
- Developed structured onboarding guides for enterprise clients adopting digital engagement platforms.
- Standardized documentation templates for client-facing technical deliverables and integration guides.
- Supported solution architects in translating system designs into clear technical documentation for stakeholders.

**ESO** · Austin, TX

### **Software Engineer Jan 2015–Feb 2017**

- Developed .NET-based backend services supporting clinical data workflows and reporting systems.
- Built SQL Server stored procedures to support operational reporting and healthcare data processing pipelines.
- Implemented REST APIs for internal applications used in emergency response data coordination.
- Improved system reliability by refactoring legacy services and reducing failure rates in data ingestion workflows.

## **EDUCATION**

---

**University of Texas at Austin** · Austin, TX

### **Bachelor of Science in Computer Science Aug 2009–Dec 2013**
